 - Unit testing
-

PROJECTS

Rancho Drive Train Engineering [🔗](#)

- Rancho Drive Train is a website that I made for a client to mainly just display information about their company and improve their online presence
- The website was built using WordPress, which utilized PHP to render static files
- Utilized Elementor and other plugins to help make the website more interactive and modernized
- Basic SEO using Google's Website Analytics and Yoast SEO to prefer the new link and sitemap as compared to the client's old website
